[Already Have an account? Login!](#)

Password and Confirm password should be same

The image shows a registration form titled "Registration" centered on a light gray background. The form is a white rounded rectangle containing the following elements: a text input field with "Isai Priya", a text input field with "isai@gmail.com", a password input field with eight dots, and a "Confirm Password....." label next to an empty input field. Below these is a message: "confirmPassword must be one of the following values: Ref(password),". At the bottom of the form is a blue "Register!" button and a blue link that says "Already Have an account? Login!".

Registration

Isai Priya

isai@gmail.com

.....

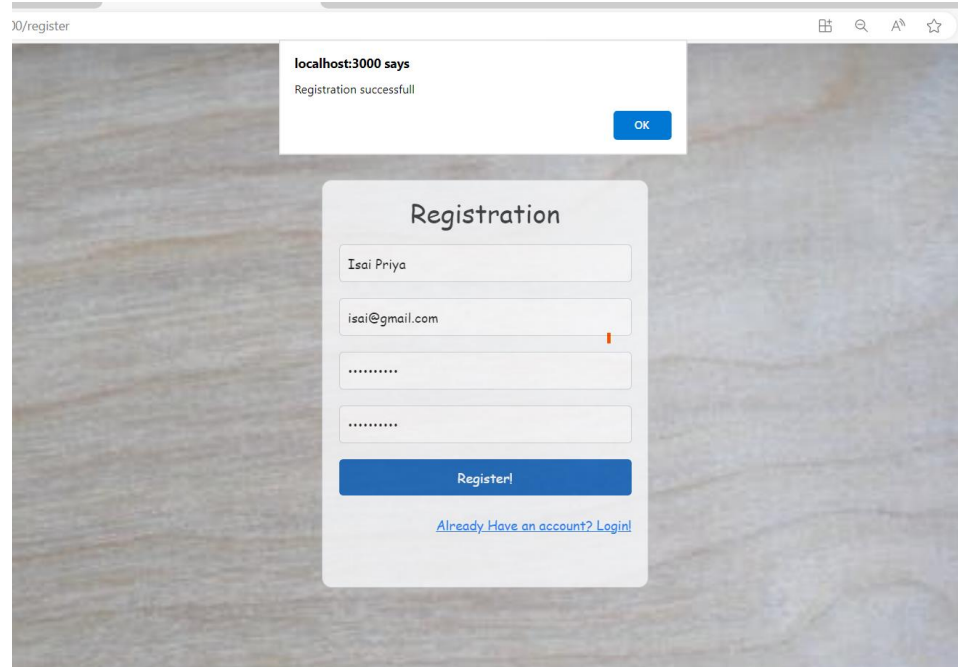

Confirm Password.....

confirmPassword must be one of the following values: Ref(password),

[Register!](#)

[Already Have an account? Login!](#)

After providing all credentials, while clicking the register button, the alert window will display

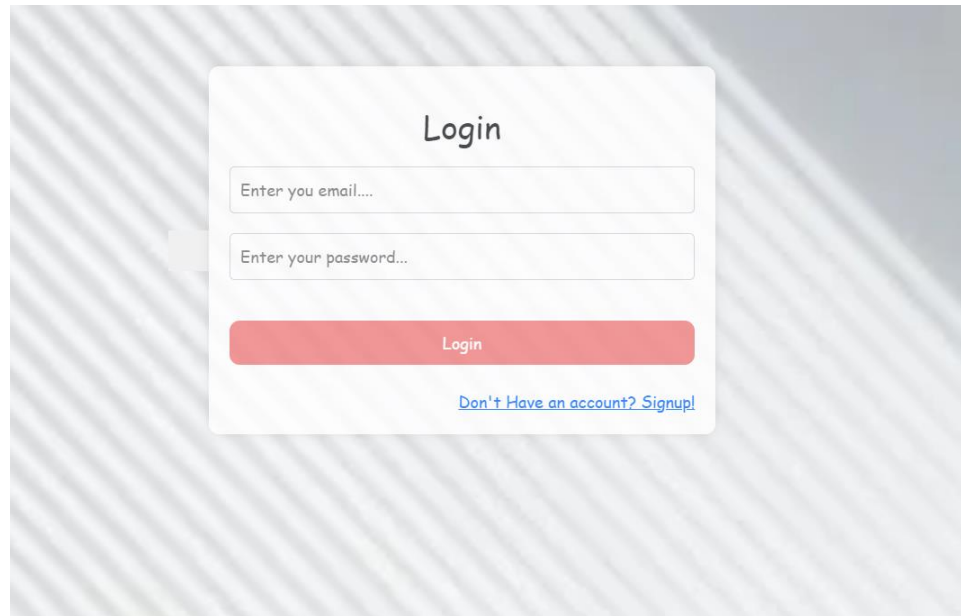

After the user successfully registered the user credentials will be stored in MySQL database along with an unique Id
